

TL 9000 108: Risk Management

Course Objectives:

To teach methods for identifying risks to the delivery of a product or service including methods for prioritizing risks. This course will also enable organizations to determine methods for monitoring risks and how to develop response plans for identified risks.

Key Benefits:

- Learn how to effectively identify risks by product or services
- Determine methods to respond to risks based on the impact to the business
- Effectively manage risks to mitigate the impact to customers

You Will Learn:

- How to identify risks to the delivery of a product or service
- How to determine methods to mitigate the risks
- How to determine severity to the risks and prioritize
- How to assign responsibility and monitoring of risks
- How to respond to risks

Who Should Attend:

- Executives and managers that are responsible for contracts and service or product delivery
- Management representatives

Tuition: **\$299.00 per student** (travel expense is not included)
