

TL 9000 116:

TL 9000 Requirements and Measurements

Course Objectives:

To teach the latest TL 9000 requirements and measurements in order that students can effectively implement and maintain the TL 9000 standard by adapting it to their own businesses.

Key Benefits:

- Learn each TL 9000 requirement from a TL 9000 Expert and TL 9000 Master Trainer
- Learn how to meet TL 9000 requirements in the context of your business
- Learn required TL 9000 measurements and the counting rules for each measurement

You Will Learn:

- The interpretation of each TL 9000 requirement and how to apply it to your business
- About the required TL 9000 measurements and how to report them to QuEST Forum
- How to identify TL 9000 requirements and measurements for hardware, software and service and which apply to your certification
- Counting rules for the TL 9000 measurements
- How to determine specialties for certification such as hardware, software or service
- Different ways that organizations can certify

Who Should Attend:

- Managers, management representatives, supervisors and employees responsible for implementing or maintaining a TL 9000 certification
- Quality managers involved with the TL 9000 standard

Tuition: **\$700.00 per student** (travel expense is not included)
